

Engro Energy is a proud partner of NEPRA's CSR Drive

Engro Energy has always played an integral role in supporting the communities through its CSR initiatives and is a proud pioneering partner in NEPRA's CSR Drive under the banner of "Power with Prosperity". The support extended by Engro Energy to help launch the "Power with Prosperity" CSR drive and work together with NEPRA is in line with our mission to solve the pressing issues of our time with credible partners.

Under the banner of Power with Prosperity, Engro recently signed an MoU with Akhuwat to help provide affordable and accessible energy to small & medium households and enterprises. Such initiatives are in line with our philosophy of deploying inclusive business models and working on improving the energy value chain. We believe that these initiatives will also play an active role in the transformation taking place in the energy sector of Pakistan. Together with our forward looking approach and initiatives under the Sustainable Development Goals (SDGs) framework, Engro Energy is committed to working with various stakeholders to bring about social welfare and provide improved socio-economic opportunities across Pakistan.
